TQC Powder Coating Meter
LD5820

Datasheet

Product description

The TQC Powder Coating Meter measures uncured powder coatings using ultrasonic technology to automatically calculate and display a predicted cured thickness.

Standards

ASTM D7378

Application area's

- coatings industry
- laboratory

Features

- Hand-held, battery operated .
- No calibration adjustment required for most powders
- Shock absorbing protective rubber holster with belt clip and magnetic mount
- Wireless probe communicates with base unit up to 10m (30 ft.) away.
- No cable to risk disturbing powder
- USB mass storage of 1,000 readings in up to 100 batches
- No download software required
- Meter generates formatted reports with measurement summaries and charts
- USB port for fast and easy connection to a PC and to supply continuous power
- Two year warranty on both base unit and probe

Disclaimer

The information given in this sheet is not intended to be exhaustive and any person using the product for any purpose other than that specifically recommended in this sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. Whilst we endeavour to ensure that all advice we give about the product (whether in this sheet or otherwise) is correct we have no control over either the quality or condition of the product or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing to do so, we do not accept any liability whatsoever or howsoever arising for the performance of the product or for any loss or damage (other than death or personal injury resulting from our negligence) arising out of the use of the product. The information contained in this sheet is liable to modification from time to time in the light of experience and our policy of continuous product development.
